

## HIPAA compliant method of documenting patient care on EMS incidents

FirstPCR is the tool that:

- Records **patient's vitals** including heart rate, blood pressure, respiratory rate, pulse oximetry, blood glucose, and CO levels
- Helps you complete the ePCR by using information already entered into the Incidents Module
- Records any **procedures** and **medications** administered
- Allows you to document a thorough **narrative**
- Provides **HIPAA-compliant** documentation to ensure your department meets federal privacy laws

**No need to upgrade to the EMS Package! FirstPCR is available as a valuable add-on to the Fire Package, State Supported Packages, or the NFIRS Only Package.**

**EMERGENCY  
REPORTING®**
