Protect Your Community to the Fullest

Google Maps Integration

Technical Features:

- Compare demographic data to other agencies
- Measure response effectiveness
- Manage information about risks in your community
- Secure login from supported internet browsers
- Automatic and fail-safe database backup and storage
- Available as a stand-alone package or as an integrated feature

VISION Risk Assessment™ is a dynamic tool that allows departments to analyze and categorize risks present in their community, compare data to other departments nationwide, and generate the Occupancy Vulnerability Assessment Profile (OVAP) score for all occupancies within their response area.

Occupancy

Manage valuable data for buildings and other structures in your agency's coverage area.

Demographics

See how you stack up against similarly sized agencies around the country.

Reports

Quickly and Easily run real-time reports to make data-driven decisions.
